

Our Aspect monitor arm projects a slimline linear design together with the versatility of offering the option of simple single configurations or multiple screen applications. Being compact in design, Aspect can be folded back flush to a screen or desk edge allowing the workstation to be clear when needed and is easily articulated into position with a button release mechanism. With its monitor quick release and a VESA plate screen lock as standard together with being compatible with all VESA compliant flat screen monitors up to 8kg, Aspect is the right choice when flexibility is top of the agenda. Loaded tested by FIRA and is available with desk edge or screen/rail mounting options.

For multiple screens the precision engineering of Aspect Double or Aspect Quad allows for two screens or four screens respectively to be mounted at the same height within infinite height adjustment possible on its 900mm single pole through movement up and down the post, removing the requirement for a separate back-to-back bracket.

key features

- Minimal design, with linear styling
- Folds back flush to screen or desk back edge
- Button release lift and lower mechanism
- Supplied with standard vesa 75 or 100 plate for screen fixing
- Quick release vesa plate fixing as standard
- Vesa plate screen lock security mechanism
- Load tested by FIRA for screen weights up to 8kg
- Available with desk edge or screen/rail mounting options
- 400mm pole length

code	description
68Z006	Full single arm with 'C' clamp fixing - Product weight 2.6kg
68Z007	Full single arm with through desk fixing* - Product weight 2.2kg
68Z096	Full single arm with universal slatwall mounting bracket

*A bolt-through mount via a drilled hole

Aspect with Universal Slatwall Mounting Bracket

- Comes ready to be fixed to a slatwall partition
- Ideal for when desk space is at a premium as removes any requirement for fixing to the desk
