

wedge power module

Wedge is a more stylish compact version for desk power, specifically designed to meet the increasing power and everyday communication needs of a working office. It has many design features like integral fuses which are fully compliant to current safety regulations, with segregated power & data together with the added benefit of being installed to a slatwall/tool rail or flush to a screen/edge of desk, making it functional yet non-intrusive to the working desk. Wedge can be used in conjunction with our under desk modules to provide greater power solutions. It is also available in an upright (Type 1) or flat format (Type 2) to suit various desking styles and demands. Upright versions are shown with the introduction of our standard silver extrusion with grey or white socket fascias/end caps.

key features

- Comes as standard in silver, with black, grey or white end caps and socket fascias
- Fully segregated power and data
- All cables exit from the rear of the module
- All UK sockets feature integral fuses. A choice of 3.15A or 5A fuses are available to comply to BS 6396:2008
- All standard options are supplied with a 1m mains lead to male 3 pole connector plug. Other options also available. Requires a separate mains lead if passing from a 13A Socket
- Data leads are supplied at a standard length of 3 metres. Other lengths available on request.
- Fully complies with BS 5733.

available in

- Upright version which clamps to edge of desk and fits flush to a variety of screens, or Flat version which fixes flush to edge of desk either by clamp or adhesive pads
- Upright version which fixes to tool rail or slatwall using adjustable fixing clamp part number 440049. This will fix to most slatwalls and rails.

2 x Power Sockets

2 x power sockets, 3.15 Amps individually fused (supplied with 1m mains lead to male 3 pole connector plug) Product weight: 0.5kg
