

Air flat screen arm

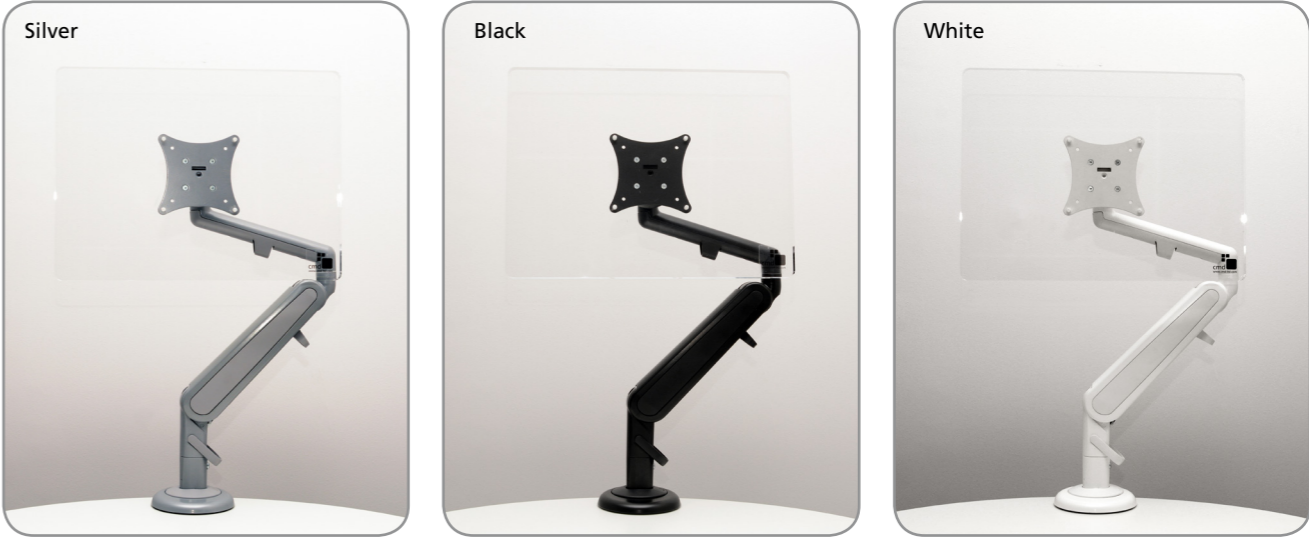

Air Gas monitor arm

- An integral gas strut counterbalances the weight of the screen allowing fingertip adjustment to the desired working position
- The arm mechanism ensures the screen remains vertical throughout any adjustment
- The arm can fold flat into 80mm of space
- The tilt and rotate head features a quick-release mechanism with a locking feature as standard permitting quick and easy monitor detachment
- Arms are supplied with an industry standard 75mm/100mm VESA mounting plate for attachment of monitors
- The arm is supplied with cable management clips

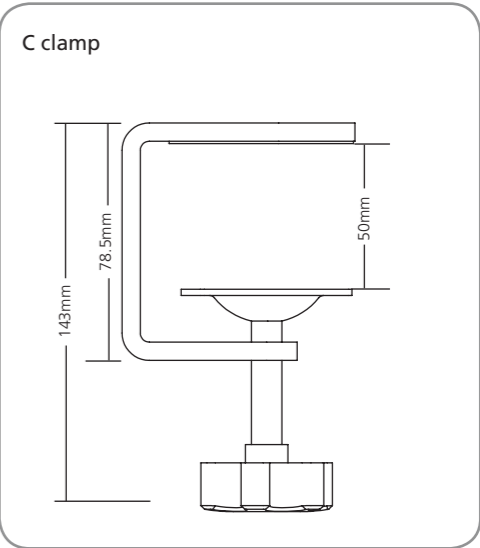

Air flat screen arm

Air has been designed with the environment in mind, built and made in Sheffield, the home of UK manufacturing. Air projects a clean and slimline exterior where functionality is prevalent yet style is not forgotten. It provides optimum performance expected from a gas assisted monitor arm using locally designed and sourced parts. Air has the range of articulation of our award winning Cygnus® arm enabling your screen to be set up according to the requirements of your working environment. Gas assistance allows the arm to move freely and effortlessly across the desk when adjusting your screen to your natural position.
