EXPORTER'S STATEMENT OF ORIGIN

We hereby confirm that the materials and components that we use to manufacture our Rotasoc product range at our Head Office registered address of Sycamore Road, Eastwood Trading Estate, Rotherham, S65 1EN are produced in the beneficiary country of United Kingdom.

Footnote: Defining the origin

There are two main categories of origin in the rules:

- goods wholly obtained or produced in a single country
- goods whose production involved materials from more than one country

This second category is the more complex as there are several criteria to consider – e.g. the origins of the materials, the country in which the final substantial production phase took place and the value the working and processing in each country has added.

If a product is manufactured entirely in the EU and is exported to a country with which there is a preferential arrangement it may attract lower or nil rates of duty when it is imported into the destination country.

We can confirm that all the materials used in the manufacture of the Rotasoc product range have been derived from within the EU and has been through significant production change.
