

Dear Customer

Chip on desk 4A USB charging module

October 2016

Chip is a new 4A USB charging module set to revolutionise the way we use on desk power.

With more and more devices using USB the demand for traditional sockets on the desk is falling. This stylish and fully integrated module simply connects to your under desk power using a Wieland or plug to offer 2 USB power supplies capable of charging all leading phones and tablets.

Available in black, grey and white as standard Chip has been designed to present a number of additional options for contrasting housing, fascia graphic and outer cover - but why

stop there. With plastic mouldings available in every conceivable colour you can customise Chip to match your office interior or corporate colour scheme. (subject to minimum order quantities and lead times).

And at just 80mm wide, Chip can proudly boast to be one of the smallest on desk USB power modules of its type - freeing up valuable desk space. The module can be fitted to any desk surface in seconds (15mm to 35mm) using a simple C clamp fixing kit, which has been designed to support desk fitted with acoustic/privacy screens.

Chip has been independently safety tested to IEC 60950-1 - Information technology equipment and includes

a thermal cut off chip to protect the user when inferior cables and devices are used.
