

Monitor Arms

Our newly designed Vision S monitor arm offers the ergonomic benefits of an assisted monitor arm but is much more affordable. Vision S can be installed at different heights to suit different environments with rotation and height adjustments being made by the individual users. The 32mm diameter pole allows a huge 330mm of height adjustment, while the design also allows a full 360 degrees of swivel movement with full head tilt to be positioned at the optimum eye level.

Vision S Monitor Arm

Features

- Each single arm can support monitors up to 6kg
- The maximum extension of each single arm is 460mm when measured from the centre of the Vision pole to the centre of the VESA mount
- The monitor can be attached using the 75mm or 100mm VESA compliant mount
- Cable management clips are supplied and can be attached to the arm as required
- Available in silver, black and white (Note: Our slatwall and wall mounted systems are only available in silver)

Improved Design

Monitor Arms

Vision Thin Client Holder

Used in conjunction with the Vision pole arm the thin client holder can support a variety of thin client sizes. The Vision pole arm can be supplied with an extended C clamp base if needed to allow the holder to be used with desk privacy screens - please ask for details.

Designed to support thin clients with a minimum height of 150mm, a maximum height of 235mm, maximum width of 300mm and maximum depth of 60mm.

Features

- Easy Fixing - Can be fitted to your existing Vision pole monitor arm or bought together for new installations
- Strong Construction - Constructed from 2mm powder coated steel making this an affordable and robust solution for thin client users
- Versatility - The Vision thin client holder is fully adjustable and can accommodate a wide range of thin client sizes
