

## **Luminaire Controller, External Mount**

### 59-SCD1000-EMUK

This rugged, wireless module is a primary component of the Audacy® Wireless Controls system. These easily-installed devices can turn on, turn off, or provide 0-10V dimming.

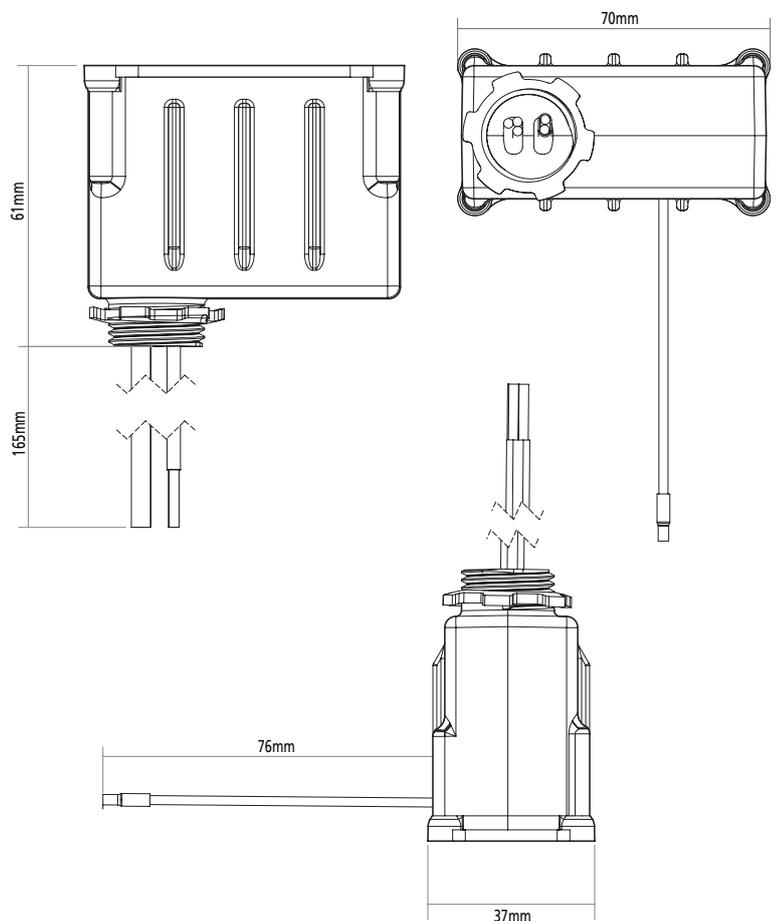

#### How It Works

AC-powered Audacy Luminaire Controllers operate in the highly reliable 915 MHz spectrum. Each Luminaire Controller has conveniently wired terminations for quick and easy installation.

#### Because Time Is Money

Your electrical installer mounts this Luminaire Controller to a junction box or luminaire body through a knockout, and the wiring is done inside the box. A typical wired system is vastly more labour intensive and costly to install.

The Audacy Luminaire Controllers get your system up and operational faster and can be modified over time with incredible ease. Luminaire Controllers transmit 90 metres to the Gateway and with the repeater mode enabled, the range is extended even farther.

# Lighting Control

The 59-SCD1000-EMUK external-mounted Luminaire Controller by CMD Ltd is an AC-powered, wireless lighting control device that is part of the Audacy Wireless Controls system.
