

Arbour

Multi-screen system

INTRODUCTION

Meet Arbour - the dynamic, pole-based multi-screen system, designed to transform the way you work and play.

Engineered to boost productivity across offices, commercial spaces, and home set-ups, Arbour gives you the freedom to view more, do more, and switch less.

KEY FEATURES

1. Dynamic movement allows fine adjustment of monitor height.
2. Supports monitors weighing 2kg to 9kg, including curved screens up to 32".
3. Supports 1, 2, 3 or 4 monitors.
4. Cable management for safe and tidy installations.
5. Easy-to-fit fixing C-clamp, to fit desk thicknesses of 10mm to 80mm.
6. Through desk (as shown opposite) and grommet hole fixing options.

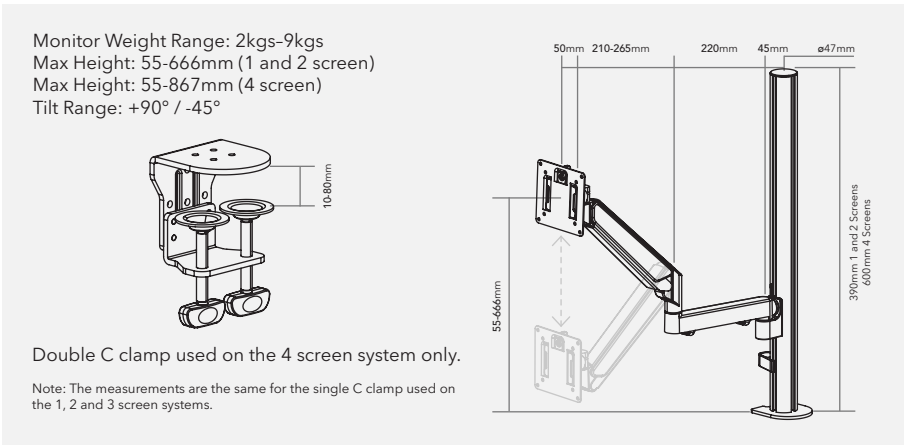

DESCRIPTION

Whether you're an IT specialist managing complex systems, a designer perfecting visuals, an engineer working across applications, a sales or service professional juggling data, or a gamer seeking a more immersive experience, Arbour adapts seamlessly to your needs.

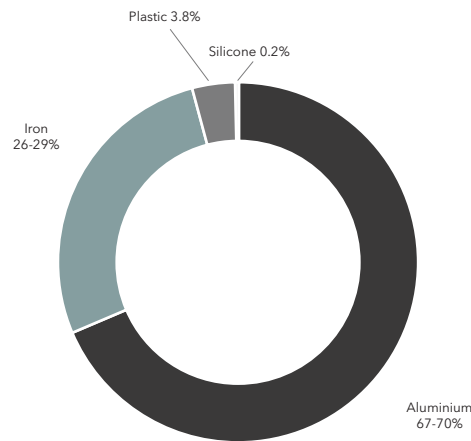

With its smooth height adjustment, support for up to four monitors (including curved screens), and integrated cable management, it combines precision, practicality, and style.

Easy to install, sustainably made, and designed to complement any environment, Arbour is the smart choice for creating a more efficient, comfortable, and connected workspace.
