INTRODUCTION

Meet Arbour - the modular dynamic, pole-based monitor arm system, designed to transform the way you work and play.

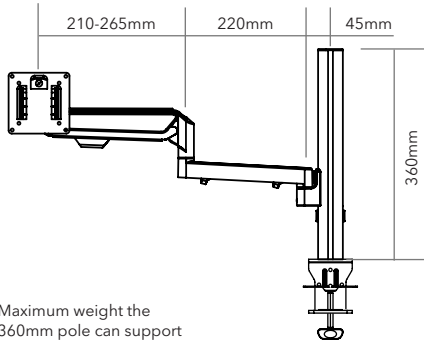

Designed to boost productivity across offices and commercial spaces, Arbour gives you the freedom to view more, do more - managing multiple applications, documents, and visual content with ease.

With its smooth height adjustment, support for up to four monitors (including curved monitors), and integrated cable management, it combines precision, practicality, and style.

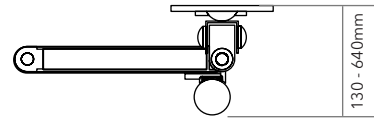

KEY FEATURES

1. Flexible, modular dynamic, pole-based monitor arm system.
2. Single, double, triple and quad monitor setup from a single pole.
3. Supports flat and curved monitors up to 32" that weigh between 2kg and 9kg.
4. Quick release VESA for quick and easy monitor installation.
5. Gas strut and VESA head adjustment using a 5mm Allen key (not supplied).
6. Integrated cable management supports up to three $\varnothing 8\text{mm}$ cables per arm, to create safe and tidy installations.
7. Supplied with a choice of fixing options for desk thicknesses of 10mm to 80mm:
 - Tool free split-clamp fixing. (a single C-clamp is used with the 300mm pole and a double C-clamp is used with the 600mm pole).
 - Through desk ($\varnothing 12\text{mm}$) fixing with M10 Allen head bolt and spreader plate. Fitting requires a 6mm Allen key (not supplied).
