

Rise shown fully assembled for illustration purposes. It is supplied without fixings. Ensure to use fixings suitable for the intended furniture. Consult with your furniture supplier if necessary.

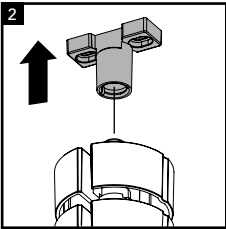

Measure the distance between the underside of the worksurface and the floor. Rise is to suit a max worksurface height of 760mm.

Contents

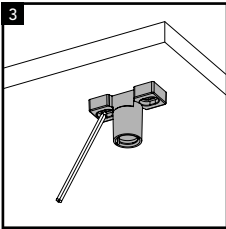

Installing the top fixing bracket

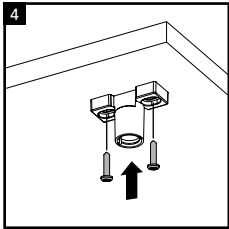

PLEASE NOTE
Fixing screws are not supplied with this product. Use 2x fixing screws suitable for the intended worksurface.

Carefully pull and separate the top fixing bracket from the top connecting block.

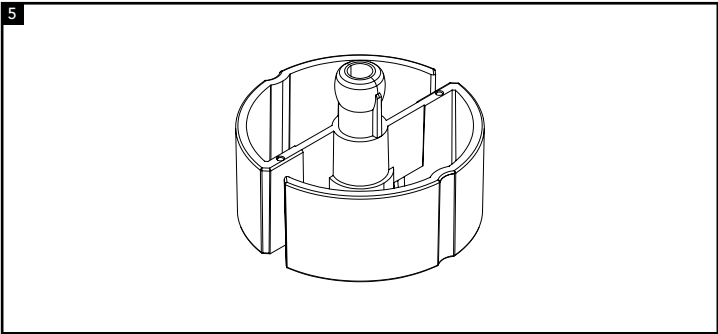

Use the top fixing bracket to mark the location of the fixing holes.

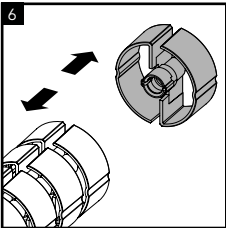

Use 2x suitable fixing screws to secure the top fixing bracket to the worksurface.

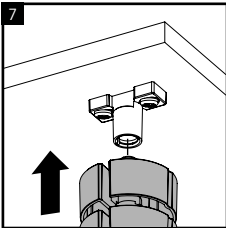

Installing Rise

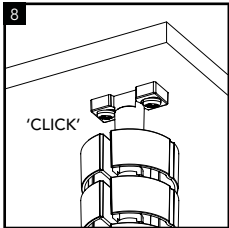

Each connecting block adds or removes 33mm to the height of the Rise.

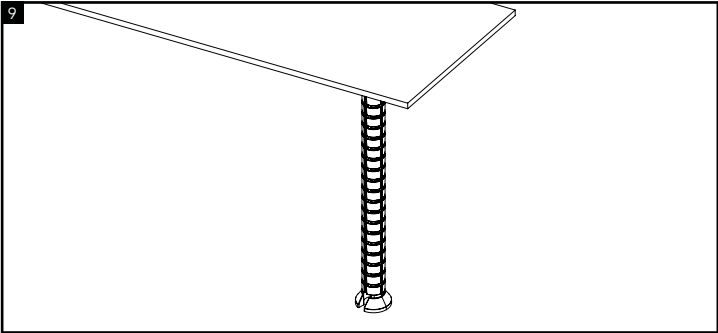

Adjust the length of the Rise to suit the desk height by adding/removing blocks.

Offer up the top connecting block of the Rise to the top fixing bracket as shown.

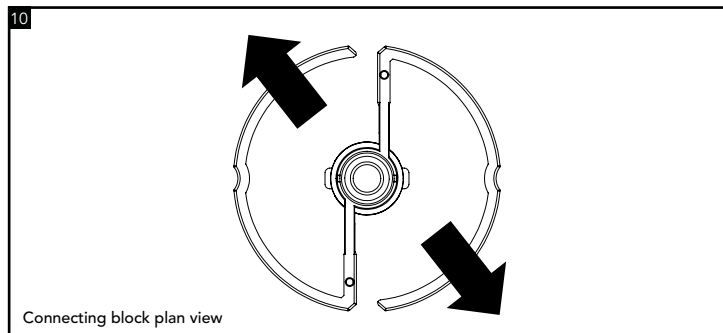

Push the block into the top fixing bracket until it clicks into place. Check it is secure.

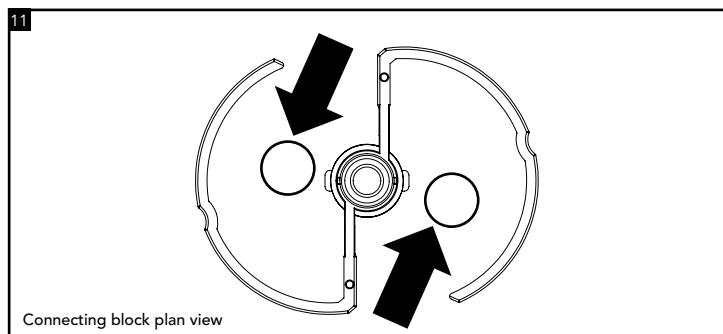

The Rise is now installed and ready to accept cables.

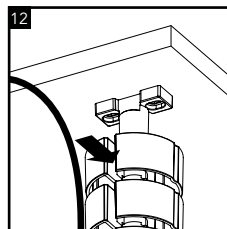

Cable management

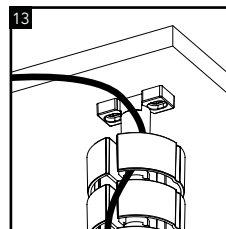

The sides of the connecting blocks can be flexed outwards to allow cables to be inserted. Be careful not to over-flex or breakage may occur.

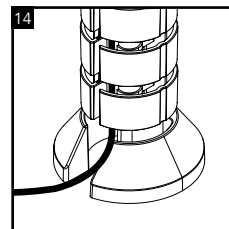

The cables shown being inserted into the connecting block. It is advised to keep power and data cables segregated if possible.

Offer up the cable to the first connecting block at either the top or bottom of the desk.

Flex the connecting block open and feed in the cable as shown.

Repeat the process until the cable can be fed out of the last connecting block.

Additional information

Safety

- Ensure the screws used for installation are suited to the furniture material. Contact your furniture supplier for a recommendation if necessary.
- Installation is to be carried out in accordance with relevant Health & Safety regulations and only to be carried out by a skilled or competent person.
